

# Street Utilities & Drainage Checklist (Catch Basins & Inlets)

General reference checklist for inspection, cleaning, minor repairs, and documentation.

## Checklist

- Asset inventory maintained or updated (location, type, condition)
- Routine inspection/cleaning schedule defined (seasonal adjustments included)
- Priority response criteria defined for flooding/blocked structures
- Traffic control and crew safety practices documented
- Work documentation includes asset ID/location, activity performed, and materials used
- Coordination process with street paving and utilities established
- Environmental protection measures applied as appropriate (debris handling)
- Post-repair verification performed (flow restored, grate secure, site safe)
